

Goal groups

The minutes and actions arising from these groups can be found in the council papers from the 23rd of February meeting. They are functioning well.

The future

University of Manchester is entering a period of funding austerity where budgets are likely to be tightened for many years to come. This may have an impact on our block grant (about £1.4 million pounds the University gives us every year).

Our response to this has to be placing ourselves in a position where the Union is the primary authority on what students are thinking on campus. So doing will make us indispensable to the University and they won't sensibly be able to reduce our ability to function.

Achieving this has to be a short-mid term priority.
