

Promoting Shine! Awards – Awards for International Students

The shine awards are an opportunity for International Students to gain national recognition for their extra curricular work and development whilst in the UK. I have been assisting the International Orientation team in publicising the event.

Also, preparing to give a talk in an orientation session that is due to be held in January for the January intake of international students. It is a two-day programme for Study Abroad and Exchange Students and I will be informing them about the services offered by the University to International Students.

Planning for a small casual meeting with society representatives, particularly those that represent countries, to discuss events that they think can help bring all International Students together. It is in the pipeline and is due to happen soon! The meeting is not restricted to anyone, so anyone who is interested and has ideas will be welcome! ☺

I shall also share with Exec and with Council my own ideas of events for International Students sometime soon. Apologies for not having it done anytime soon because I have had major coursework deadlines to meet! ☺
